

To Whom It May Concern:

I am extremely concerned by the FCC consideration of limiting local weather and traffic programing on satellite radio. This violates the people on so many different levels it is hard to know where to start. First, there is freedom of speach. Second, if government should be doing anything it should be encouraging competition rather than put up questionable barriers to new enterprising activities. The list goes on. Again, I can't believe that this would even be considered beyond the laugh test as a possible action by the FCC.
